

# Monitoring of Patients Not Considered for Therapy

Disease State	Recommended Follow-up
Inactive HBsAg carrier state	<ul style="list-style-type: none"> <li>▪ ALT every 3 mos for 1 yr; if persistently normal, ALT every 6-12 mos</li> <li>▪ If ALT &gt; 1-2 x ULN, check serum HBV DNA level and exclude other causes of liver disease. Consider liver biopsy if ALT borderline or mildly elevated on serial tests or if HBV DNA persistently <math>\geq 2000</math> IU/mL. Consider treatment if biopsy shows moderate/severe inflammation or significant fibrosis</li> <li>▪ Consider screening for HCC in relevant population</li> </ul>
